

Quality in chemistry. Serving man and environment.

At WIGO, quality is more than just a word. Our commitment to the highest possible quality characterizes our self-image and our way of doing business. When we talk about quality, we don't just mean product quality in the narrower sense, but also a sustainability standard for our development and production.

This philosophy is reflected in our work right down to the basic processes. Well qualified employees and active internal and external communications are part of this, as well as an efficient management system and continuous quality controls.

The following facts are proof that all this has been engrained in everyday life at WIGO for many years:

- WIGO possesses renowned and certified management systems:
 - DIN ISO 14001 (Environmental management)
 - DIN EN ISO 9001:2000
- WIGO is one of the few chemical producers to achieve voluntary certification in accordance with the particularly strict **ISO TS 16949** standard for automobile manufacturers.
- In 1991, WIGO became the first chemical producer to be awarded the Q-1 award from Ford AG and currently holds this title as Super Supplier.

Thomas Stewing
Managing Director

Taking environmental protection seriously.

Our aim is to protect air, water and land. Wether during production or later, when our products are used across the market. This is why WIGO is involved in the “Responsible Care” initiative of the German Chemical Industry Association and brings its guiding principles to life.

Questions concerning chemical safety, biological degradability and disposal play a significant role at WIGO from the earliest stages of development – for example when selecting raw materials. Additionally, we are continually optimizing our processes.

Furthermore: All of our facilities are approved in accordance with the German federal emission protection law and our facilities management system certified according to the international ISO 14001 standard.

The best. For cars and two-wheelers.

WIGO has a particular focus on the automobile segment. Our products enable fast and efficient work with outstanding results.

Whether it's for the professional preparation of used vehicles or surface cleaning, for additives or technical workshop products: WIGO's Car Care chemical range caters for all needs. The Basic, Premium and Excellent product ranges offer the right product for every occasion.

To name just a few examples, our products cover the areas of interior cleaning, preservation and degreasing, lubricating and paint care.

The most important ingredient for success is also innovation. As we are continuously developing specific solutions for tomorrow's vehicle applications, we impress time and again with pioneering innovations. For example with nano-agents or UV-linked polishes which are still only available from WIGO.

Two-wheelers: More than just a mode of transportation.

Riding a motorcycle is about more than just getting from A to B. It's a statement and according to this the target group is sophisticated. Just like the products from WIGO.

A similar thing applies to cycling: Regardless of whether you are dealing with a "grocery-getter" for everyday use or a high-tech bike for semi-professional or professional use on roads and hills – our products ensure safe riding and optimal function and keep wear at a minimum.

WIGO offers a wide range of tailor-made specialist products for the care and value retention of two-wheelers. This includes care agents for paint, chrome, plastic or chains as well as high-quality oils for engine, transmission gearshift or fork.

Products for mineral oil companies and gas stations.

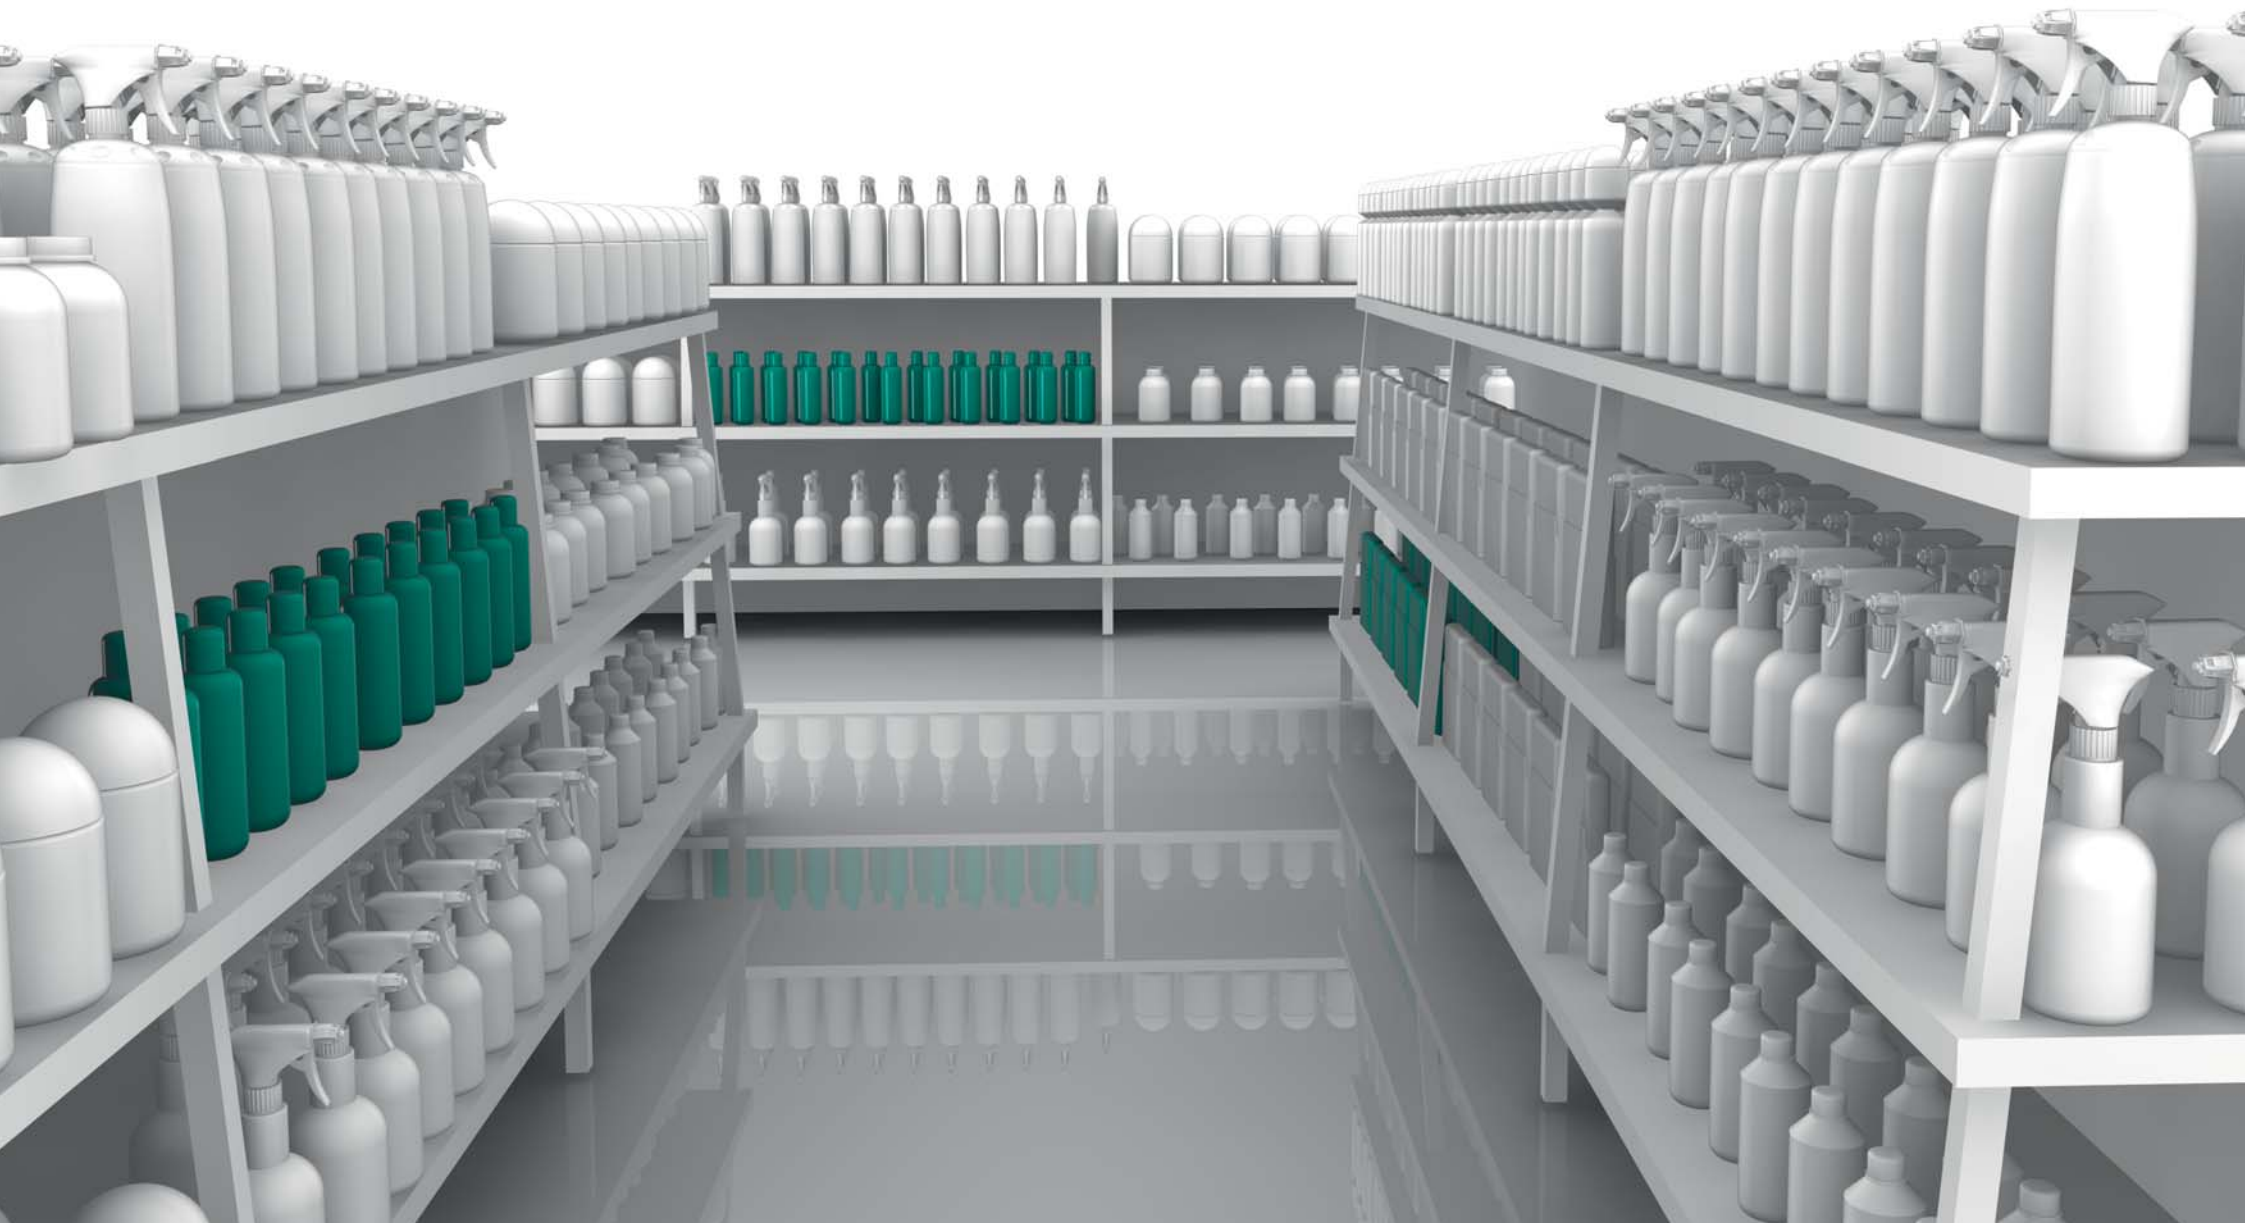

The days in which we drove to the gas station “only” to refuel are long gone. Today, gas stations are open 24/7 to provide all kinds of everyday goods – from coffee and snacks to newspapers or many other products. As “convenience stores”, they fulfill an important supply function in the surrounding areas.

It goes without saying that products for washing, cleaning and caring for vehicles are among the standard products stocked by gas stations. Not least because they often possess more knowledge on the subject than the DIY store around the corner.

Furthermore, the marketing of a proprietary label under the umbrella of a strong mineral oil brand creates additional trust and constitutes a considerable business opportunity.

To ensure that mineral oil companies and gas stations can always offer their customers the appropriate products, WIGO offers a wide range of private label products. A total of three categories are available: Basic, Excellent and Premium. These include the appropriate applications for every requirement, from DEKRA-certified rim cleaner to a convenient and effective touchscreen cleaning cloth. WIGO also provides support for labeling, market and location analysis and much more.

Popular and always up-to-date. For retail, parts trade and workshops.

In the retail and parts trade, two elements are of the utmost priority: Top quality and a modern product range which offers the right solutions for current demands, fulfilling all customer requirements.

As well as market knowledge, sensitivity and speed are required here in order to anticipate trends and developments and bring a product to market maturity at the right time.

Over more than 60 years of experience in the industry, WIGO has proved time and again that it possesses this sensitivity. Our range of products currently includes more than 500 applications. And our portfolio is continuously being further developed in order to meet the demands of new materials or new user habits.

For this reason, WIGO is an esteemed and reliable partner in the retail and parts trade. One reason for this is our logistics, which ensure that ordered products are delivered on time and to the correct location. Because in this business, there's nothing worse than a customer leaving empty-handed.

As a global player, WIGO supplies customers all over the world and fulfills the demand for fair and trusting cooperation. Because challenging targets can only ever be achieved together. Our customers reward this attitude with their long-standing loyalty.

It is also this attitude which motivates us every day anew to achieve peak performance in serving our customers. In the following, we would like to present several products to you in detail.

Exterior Cleaning and Care

Car Polish

All-round care for freshening up and weather-proof preservation of slightly weather-beaten paint. With UV filter to protect against strong sunlight.

Car Shampoo Variations

Cleans paint streak-free. Kind to the skin and compliant with all hygiene regulations.

Car Wax

Liquid hard wax. Retains the shine of paints which are in good condition or have undergone intensive cleaning. Robust preservation against shampoo and the elements.

Textile Material Convertible Soft Top Waterproofing

A special combination of high-quality fluorine agents, offers intensive protection against moisture. Suitable for convertible soft tops and for textiles and synthetic fibers.

Convertible Soft Top Cleaner

Active foam cleaner, removes oil, grease residue, soot, insects and environmental soiling from convertible soft tops.

Rim cleaner non-acidic/acidic

Intensive rim cleaner which quickly removes or softens the typical and extreme soiling which occurs in the rim area of cars.

Rim Cleaner Gel

State-of-the-art formula with gel structure and excellent creep and dirt infiltration properties.

Rim Wax

A lasting protective shield for the long-term value retention of high-quality rims.

Glass Cleaner 1:10

Concentrate for the removal of greasy and environmental dirt. Wide differentiation spectrum.

Insect Remover

Special cleaner based on agrarian alcohol for the removal of stubborn insect remains on paint, chrome and glass surfaces.

Paint Cleaner

Intensive cleaner for badly worn and weather-beaten paint.

Metallic High Polish

Special polish for all metallic paint. Guarantees gentle cleaning and gleaming shine.

Multi-Cleaner

Solvent and phosphate-free specialist product for cleaning garden appliances, bicycles, motorcycles, lawnmowers, tools, etc.

Window Cleaner with Insect Remover

For the windscreen washer system. Dazzle-free cleaning. Removes oil, insects and other dirt typical of the summer season. Suitable for polycarbonates.

Window Cleaner Concentrate 1:100, 1:200

High-performance concentrate for the windscreen washer system. Removes dirt in seconds. Improves driving safety through clear visibility.

Tar Remover

Easily removes tars and oil sprays.

Wax Polish (UV-linked)

Very hard specialist wax with the highest mechanical resistance (reduced insect adhesion) at high speeds. Thermal resistance when exposed to strong sunlight. With preservation effect six times higher than that of conventional polishes (wash-resistance). Excellently suitable as rim wax for preservation and shine enhancement.

Wash & Wax

The perfect fully concentrated product for shining cleanliness and all-weather protection in one fell swoop.

Interior Cleaning and Care

Cockpit Care

The optimal make-up for all plastic parts. Especially for interior paneling and varnished interior surfaces.

Interior Cleaner

Foam cleaner with a wide area of application. For crystal-clear windows and mirrors. Cleans rubber and plastic, removes films of dirt and nicotine residue.

Air Conditioning Cleaner

A new type of disinfection for air conditioning systems for the effective elimination of bacteria and fungi. Alcohol basis and kind to materials.

Plastic Deep Cleaner

Lends plastic surfaces a matt satin shine with dust, dirt and water-repellent properties.

Leather Care and Cleaner

High-quality leather care and cleaner with valuable ingredients and nutrients for smooth leather. Lends the leather grip and pliability. With mild and caring cleaning components.

Upholstery Cleaner

Active foam cleaner for upholstery, seat covers, textile footmats, carpets, etc. Dermatologically tested.

Upholstery Sealant

Possesses outstanding water and dirt-repelling characteristics. Colorless waterproofing for textiles, seat upholstery and convertible soft tops.

Motorcycles

Anti-Fog Spray

Anti-fog spray prevents misting, e.g. through exhaled air and condensation on helmet visors, interior glass surfaces, plastics and mirrors. The gel forms an invisible protective film with mist-inhibiting effect.

Anti-Rain Spray

Anti-rain spray is a special agent for the treatment of glass and plastic surfaces. It forms an invisible protective film which lets raindrops pearl off. This product is particularly ideal for the treatment of visors.

Chrome Polish

Chrome polish removes rust and dirt and protects against additional rusting. Brings chrome surfaces to a shine.

Dewatering Fluid (DWF)

A specialist spray for vehicle care and maintenance; ideal for the care and preserving treatment of all rust-susceptible metal parts. For loosening, cleaning and lubricating stiff mechanical connections. Rust inhibitors care for bare metal surfaces and protect metal parts. Strong grease-removal effect and penetrability. Water-repelling.

Filter Oil

For all foam and metal-web air filters. Also highly suitable in the case of extreme off-road use. Optimal air flow for smooth starting behavior and maximum engine performance.

Filter Cleaner

Special cleaner/de-greaser for the treatment of foam or cotton intake air filters. Dissolves dirt and filter oil residue quickly and reliably. Quick-drying for fast and simple maintenance of the filter liner.

Specialist Gel Cleaner

Suitable for cleaning all parts of the motorcycle and particularly rich and effective due to its special gel form. Removes even the most stubborn dirt with no residue. Even adheres to vertical surfaces.

Helmet and Visor Cleaner

Automatically and gently removes even the most stubborn dirt, insect remains, etc. and ensures clear visibility for increased safety. Active protection against the effect of UV rays and the elements.

Helmet Padding Cleaner

Dermatologically approved product. Cleans helmet padding quickly and gently without affecting the surface of the padding. Removes sweat, grease, dust and other types of dirt with ease. Anti-bacterial.

Chain Cleaners

Effective specialist products which provide optimal cleaning for motorcycle chains. Simultaneously achieve coarse de-greasing of the chain. Suitable for all motorcycle chains with O, X and Z-rings. High wear protection. Non-acidic. Automatically dissolves and removes oil, grease, brake fluid and stubborn dirt.

Chain Spray

Chain lubricant grease for motorcycle chains with and without O and X-rings. Suitable for on and off-road use. Offers outstanding wear protection and excellent adhesion properties for great slip-resistance. Protects against rust and is water-resistant.

Chain Spray Variations

Fully-synthetic specialist greases for chains, Bowden cables and articulated links. Suitable for all motorcycles with O, X and Z-rings. Improved visibility on chain when used. High wear and rust protection as well as slip-resistance thanks to outstanding adhesive properties. Extremely durable, as very temperature-resistant and possesses pressure absorption properties.

Motorcycle Cleaner

Specialist cleaner for motorcycles. Also suitable for scooters, trikes and quads. Cleaner concentrate in gel form with extremely good adhesion properties. Gentle and thorough removal of dirt from sensitive paint and polished metal surfaces. Rust inhibitors do not attack bare metals.

Polish and Protection Wax

Cleaning and care agent with special natural wax components. Protects against the elements and automatically preserves all paint, chrome and plastic parts. Ideal for scratch-free cleaning of paneling discs.

Silicone Spray

Heat-resistant care agent for areas under strong thermal load (engine parts, cylinders, exhaust pipes, crank housing). For the care and water-repellent treatment of cables, rubber and plastic parts as well as for the eradication of squeaking and creaking noises in molded plastic parts.

Technical products

Aluminum Spray

Extremely resistant rust protection polish with chrome-silver effect. For all metallic surfaces. Particularly high quality: 99.5 % aluminum purity. Extremely temperature resistant up to 800 °C. Electrically conductive.

Car Shampoo

Shampoo concentrate for manual and automatic exterior cleaning.

Brake Cleaner

Removes oil, grease, brake fluid and dirt. Cleans contacts in the distributor and electrical contacts on the starter motor and alternator. Dissolves resinified residue.

Brake Service Spray

For the professional brake service: Specialist lubricant on synthetic basis. Temperature-resistant from -30 °C to +1.000 °C, while also particularly adhesive and pressure-absorbent. Resistant against spray and salt water. With

noise-dampening effect. Free of metals, acids and silicates. With anti-corrosion and anti-oxidation characteristics.

Seal and Adhesive Remover

Fast and powerful dissolvent-based special cleaner: Powerful help against stubborn residue from seals, adhesives or paint. Achieves metal-like cleanliness. Suitable for hard, non-absorbent bases such as metal, ceramic or glass, as well as several kinds of plastic such as polyamide. Adheres well and can be used easily on vertical surfaces.

Glass Cleaner

Cleaning concentrate for the removal of greasy environmental dirt. Suitable for the interior and exterior cleaning of all glass surfaces.

Handwash Gel

Deep cleansing for stubborn dirt such as tar, paint, soot, grease, etc.

Cavity Sealing

Brown – transparent. Secure protection for all body cavities. With special rust protection effect and excellent penetrability. Wax basis. Due to special penetrability, provides reliable protection against rust for all body cavities. Infiltrates moisture and largely prevents the spread of existing rust.

Cleaner Solvent/Degreaser

For engines and transmission units. Removes oil, grease, bitumen, tar and resin from engines, power units and repair parts. For the removal of paraffin wax.

Copper Spray

High-strength, high-temperature lubricant with rust protection. Prevents solidifying and fusing as a result of heat. All-purpose: exhaust, screw threads, brake systems, disc brakes, tank, turbines, and much more.

Leak Detection Spray

Aqueous solution with low surface tension for the fast and reliable detection of leaks in gas and air pressure systems. Protects against rust.

Oils

Engine oils, transmission oils, cardan oil, fork oils, power steering oils and more. In accordance with classification API, ACEA, JASO.

Rust Release

Specialist agent with high meshing and creep effect to ease the removal of corroded screw connections in the industrial and commercial trade.

Strong Screw Retention

High-strength screw retention. Prevents the unscrewing of connections strongly affected by vibrations and knocking and offers lasting safety. Strong sealant effect against leakages. Prevents the formation of rust in the thread. Temperature range from -55 °C to +150 °C. Good chemical resistance.

Silicon Care

Grease, oil and solvent-free anti-friction and lubricant agent for use on sliding roofs and seat rails. Prevents sticking and freezing of rubber parts on cars. Separating agent for rubber, metal, glass, plastic, wood and paperboards.

Lubrication Spray – white

Non-drip, white, high-performance lubricant for reliable lasting effect. Lasting lubricating security, temperature-resistant and adhesive. For shafts, joints, bolts, hinges, sliding rails and chains, springs and lock strikers.

Stonethrow and Underbody Protection

Light/black, coatable. Permanent stonethrow and rust protection on natural rubber-synthetic resin basis for sills, wheel mountings, and spoilers. Good adhesion also on PVC. Prevents rust damage due to moisture and grit. High stability

under load enables wet film thickness of up to 2 mm on vertical surfaces.

Teflon Spray

High quality, pressure and heat-resistant, synthetic solid lubricant for optimal wear protection. Forms an extremely resistant lubricant layer. Temperature resistant from -50 °C to +200 °C. Reduces friction noise. Moisture-repellent, resistant and protects against rust.

Universal Cleaner

Removes grease and oil stains, brake pad residue, polish residue, pigment dirt and insect remains as well as removing marks from plastic, upholstery and textiles, etc.

Underbody Protection – black

Preventions rust damage due to moisture and grit. A resilient, non-adhesive coating with high abrasion resistance is formed after drying.

Wax Underbody Protection

Fast-drying. PVC-compatible for all underbodies. Prevents rust damage due to moisture and grit. An elastic coating with strong rust-protection effect appears after drying.

Workshop Universal Cleaner

Alkaline intensive cleaner with strong cleansing effect on dirty

and greasy tiles, workshop floors, benches, etc. Concentrate with little foam.

Zinc Spray

High-quality rust protection with more than 91 percent pure zinc. Highly heat-resistant up to over 300 °C. Provides lasting rust protection for metals containing iron. Also suitable for spot welds. In accordance with DIN 50 976.

Zinc Spray – light

Professional protection for metallic surfaces in the color of galvanized metals. Strong filler characteristics on aluminum-zinc basis in accordance with DIN 5002/1, Long-term rust protection in accordance with DIN 50017. Good wear resistance in accordance with DIN 53754. Reliable adhesion to metals in accordance with EN ISO 2409. Heat-resistant up to 650 °C. Quick-drying and subsequently waterproof. Conductive.

Winter Products

Low-Viscosity Grease Plus Lock Release

High-tech “viscosity transformer” (from liquid to almost solid). Provides outstanding lubrication. Protects against rust, reduces friction and repels water. Corresponds to specification VW TL 745.

Frost Protection and Window Cleaner -30 °C Mix

Convenience blend for the windscreen washer system. Keeps windows clear of frost. Enables clear visibility. With anti-limescale formula and fresh scent. Free of methanol and reclaimed materials.

Frost Protection and Window Cleaner Concentrate -60 °C

Protects the windscreen washer system against freezing and keeps the windows free of ice. With highly effective cleaning additives. Suitable for polycarbonate. With anti-limescale formula. No streaks even at high speeds. Designation-free. Suitable for fan nozzles. Spectrum: Low price to test victor and specification qualities. Scent and color optional. Monoethylene glycol (MEG, hazardous to health, water pollution class) is replaced by renewable raw material and offers outstanding frost protection values and cleaning performance.

Rubber Care

Specialist care agent for automobiles (door and hood seals). Helps retain the elasticity of the seals when used regularly. Reduces friction when opening and closing doors, suppresses noise and prevents seals freezing even in heavy frost.

Radiator Protection Agent – nitrate-free

Permafrost and rust protection agent for summer and winter. Outstanding rust-protection qualities. Suitable for aluminum engines. Nitrate, phosphate and amine-free.

Radiator Protection Agent PRE-MIUM – silicon-free

Permafrost and rust protection agent suitable for lifespan fulfillment of cast iron and fully-aluminum engines. Silicate-free, carboxylic acid technology. Enables long-term protection for all engine materials.

Radiator protection agent PREMIUM PLUS

Permafrost and rust protection agent for summer and winter. Prevents overheating, rust and frost damage to the engine. High-quality care substances guarantee a long life for the cooling system. Particularly suitable for passenger car engines. Nitrate-free.

Window Defroster

Effective and functional down to -20° C. Thaws frozen windows quickly and reliably. Protects against re-freezing.

Starting Aid Spray

Enables trouble-free starting. Conserves the battery.

Winter Set

A combination of various winter products plus ice scraper and demisting cloth.
